Better Education for Women in Science & Engineering: A Program of the San Diego Science Alliance

http://www.sdsa.org/BEWiSE/info.html

BE WiSE seeks to excite girls about science and to encourage girls to consider career opportunities in science and engineering.

BE WiSE exposes these girls to adult women scientists who share their knowledge and passion and experiences with science and engineering careers.

Be WiSE is a program run under the The San Diego Science Alliance, which is a non-profit consortium of leaders from business, K-12 education, higher education and scientific institutions in San Diego County, and is committed to enhancing science literacy in K-12 education.
